

Technical Advances in the SGI® Altix® UV Architecture

This presentation contains forward-looking statements regarding the SGI® server family and roadmap, other SGI® technologies, and third-party technologies that are subject to risks and uncertainties. These risks and uncertainties could cause actual results to differ materially from those described in such statements. The reader is cautioned not to rely unduly on these forward-looking statements, which are not a guarantee of future or current performance. Such risks and uncertainties include long-term program commitments, the performance of third parties, the sustained performance of current and future products, financing risks, the impact of competitive markets, the ability to integrate and support a complex technology solution involving multiple providers and users, the acceptance of applicable technologies by markets and customers, and other risks. These forward-looking statements are subject to risks and uncertainties as set forth in the company's Forms 8K and most recent SEC reports on Form 10-Q and Form 10-K. SGI is under no obligation to publicly update or revise any forward-looking statements, whether to reflect new information, future events or otherwise.

Product plans, descriptions, and dates are estimates only and subject to change without notice. SGI may choose not to announce or make generally available any products or programs discussed in this presentation. Therefore, you should not make changes in your business operations on the basis of the information presented here.
